

concepts and artistic works
2023

A little something about us:

sqr studio is an architectural visualization studio founded by Nicolas Reissig and Artem Bobrov in 2021.

After many exciting years in the industry we decided to get back to the base by starting a new cozy little studio to continue our journey through the real estate world and find new adventures.

Our goal is to be close to our partners, share ideas and thoughts, thrive together and most importantly achieve beauty together in each and every project, no matter if it is a small cabin or huge skyscraper.

This portfolio contains non commercial work, concepts and artistic experiments. While we love working with clients to showcase their designs, we sometimes also need to try different approaches and test our own ideas. Those ideas you find on the following pages. Enjoy!

Nicolas and Artem

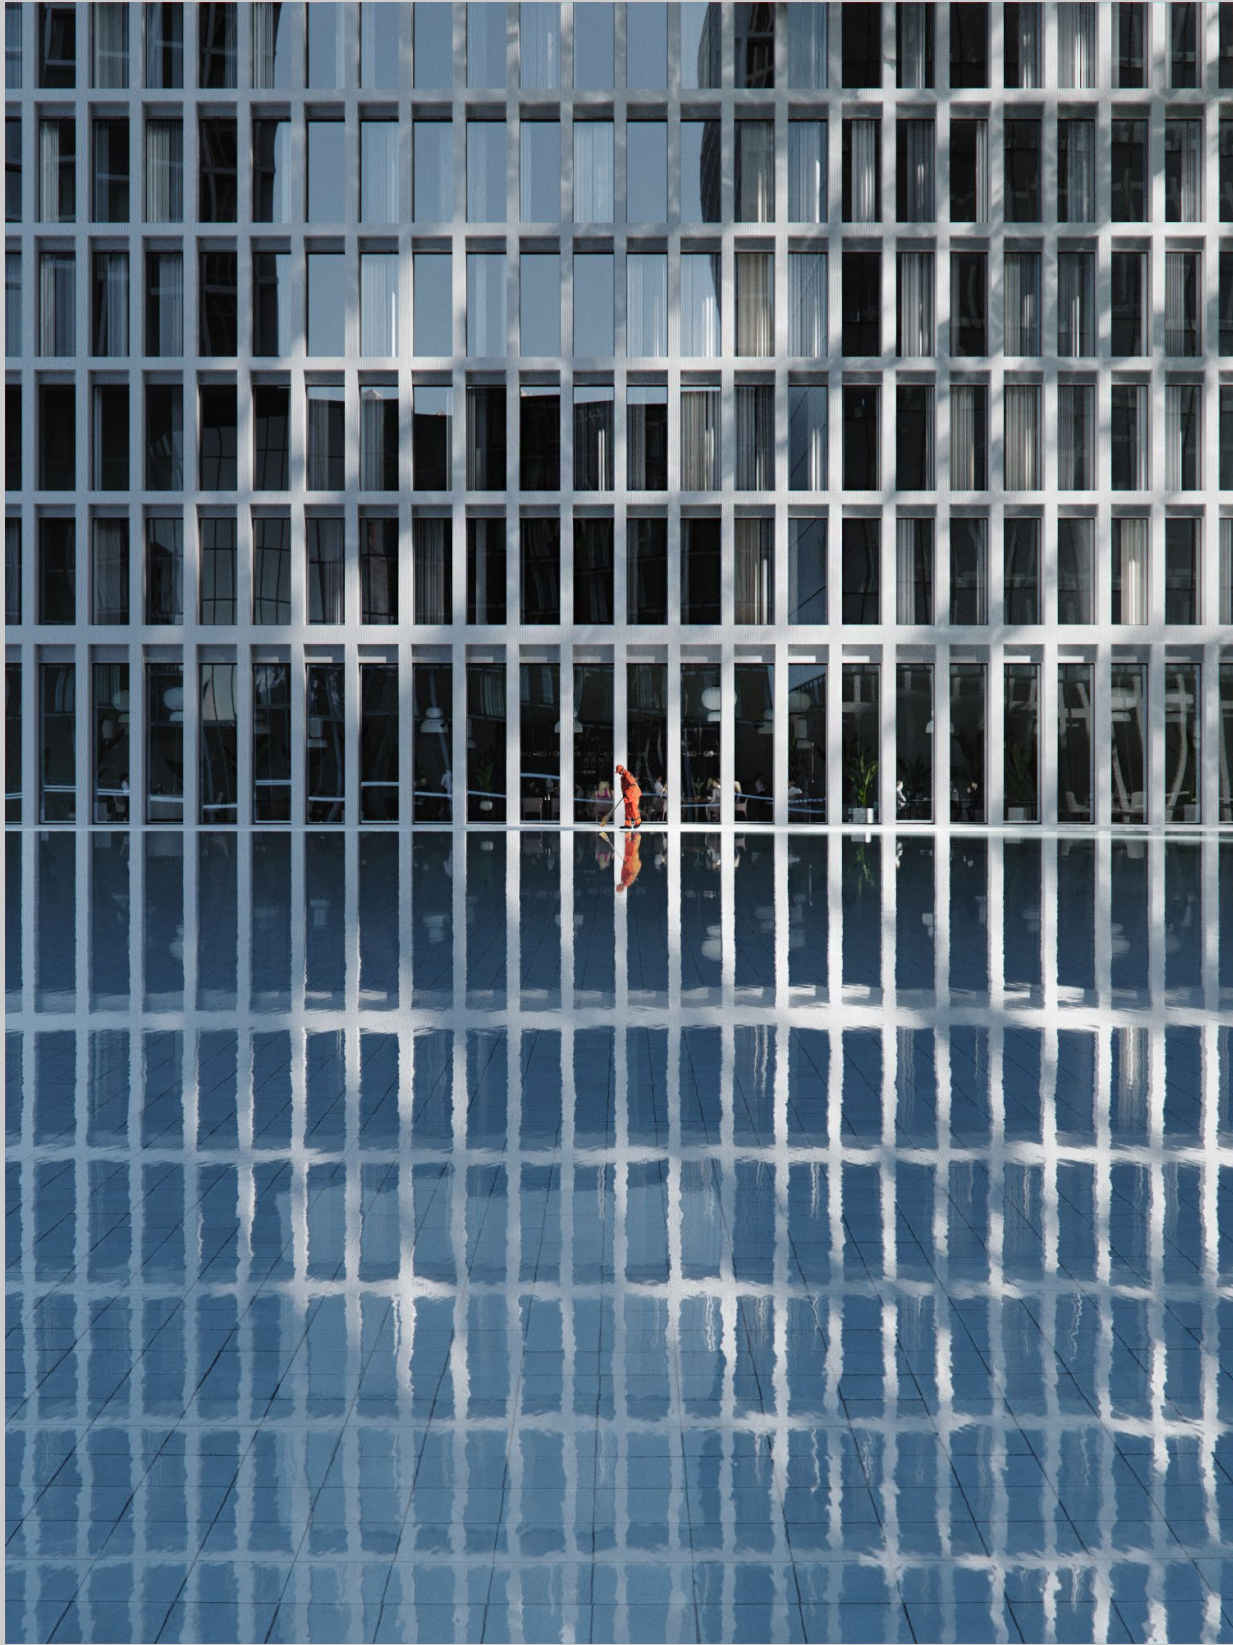

If you want to find out more about us, our workflow, our ideas, our services, our hobbies or you simply want to have a quick chat for no particular reason at all - feel free to drop us a mail or give us a call.
